

## 18 DSO 05

### Free-standing Mounting Post

#### Features and Functions

- For free-standing mounting of **INDUSTRONIC** intercom stations of the DA(E)/DX(E) 0x5 series
- Cable entry at the bottom
- Ideal for gates or entrance areas
- Can be combined with acoustic hood
- Additional signaling devices can be mounted

The free-standing mounting posts of the 18 DSO 05 series from INDUSTRONIC are used in areas where you cannot directly mount the intercom station to a wall or steel I-beams. They are made of sheet steel and are directly bolted to the ground. You can mount a single intercom station to it. The cable is fed through the bottom of the mounting post.

The mounting post can be combined with an acoustic hood for high ambient noise environments. Additionally, you can mount acoustic or visual signaling devices.
